Machinery & Equipment Appraisal Services

PARTNER

One Partner. Every Perspective.

Appraisal Services

- Asset based lending and collateral support
- Financial reporting, including International Financial Reporting Standards (IFRS)
- Insurable value analyses, including replacement cost and actual cash value considerations
- Personal property tax appraisals and assessment support
- Gift and estate valuation support
- Litigation support and expert valuation analysis
- Normal useful life studies and remaining useful life analyses

Standards of Value

- Fair Market Value (FMV)
- Fair Market Value in Continued Use
- Fair Market Value Installed
- Fair Market Value Removed
- Orderly Liquidation Value
- Forced Liquidation Value
- Actual Cash Value (ACV)
- Replacement Cost New (RCN)
- Other value premises as required by the client or assignment

Power Generation Specialization

Our power generation experience includes conventional and renewable technologies such as natural gas, coal, nuclear, solar, wind, battery energy storage systems (BESS), hydroelectric, geothermal, renewable natural gas, biomass, and waste-to-energy facilities.

We understand the valuation issues unique to power generation assets, including equipment configuration, operating status, marketability, remaining useful life, repowering, and project finance considerations.
